

Which Test?

Bryan Mui – UID 506021334

Score

3/10

Reflection

I believe I did not learn about the majority of these tests when I took Stats 101B with Almohawas Akram. I would need to study and re-learn all of these tests and study up on specifically which tests to use in which scenarios and what factors make the test viable/not viable. I think this is important especially for a statistics consultant to be able to identify which direction to test once given a real life problem.
