

Start Your Posters

Statistical Consulting for Data Scientists

Due 02/24/2025 by 11:59pm

Introduction

Done as a team. Please appoint one person to take notes (or refer to prior notes) on what the team likes in a poster. If your team is clever, you can include the notes in the poster. Otherwise notes are just for your records, no need to turn them in.

Please choose at least one of the templates (they can be found in the `_docs` folder) and copy and modify it.

The available templates can be found in the following folders within the `_docs` folder, we recommend downloading the entire folder to insure correct formatting.:

- `betterPoster` (has been tested on Overleaf)
- `betterPoster_RMarkdown` (has been tested in RStudio)
- `DoStemplate` (has been tested on Overleaf)
- `Jacobs_RMarkdown` (has been tested in RStudio)
- `quarto_typst` (has been tested in RStudio & VS Code but need to add a quarto extension to make work see <https://github.com/quarto-ext/typst-templates/tree/main/poster>)

You may need to run the following two lines at the console prompt in R in order to get `betterPoster_RMarkdown` to render:

```
install.packages("devtools")
devtools::install_github("gerkelab/betterposter")
```

Your Work

Please upload your team's attempt at getting a poster started **today** by rendering a modified poster template and the poster output (PDF) should have your team photo on it and your names, that's all. I just need to know that a poster will render on at least one of your computers.

The remainder are some suggested modifications:

- Please attempt as many of the following modifications as you are able
 - Modified Title
 - Modify a section title
 - Modify text or add a paragraph of text to the body of the poster
